

Prepainted Galvalume™ System

- Durable, beautiful finishes - regular and high molecular weight polyesters, silicon modified polyesters, fluoropolymers, - in a wide range of proven colours
- High performance primers are key to long term corrosion resistance and paint adhesion
- Pretreatment provides excellent corrosion resistance and adhesion
- An aluminum-zinc alloy coating- 55% aluminum, 45% zinc
- Steel sheet
- Backer coats to enhance corrosion resistance and minimize abrasion damage

* Galvalume Does Not Have The Paint Finish Or The Primer

Steel Roofing Advantages

- Great appearance
- Affordable
- Lightweight
